Amendments to Claims

Please amend the claims as follows.

1. (Currently Amended) A moisture vapor permeable, substantially liquid impermeable composite sheet material comprising:

a moisture vapor permeable monolithic polymeric film comprising a polymer selected from the group consisting of a block polyether ester copolymer, a poly(etherimide) ester copolymer, or a combination thereof, having a first side and a second side, and

a first nonwoven layer comprising a moisture vapor permeable powder-bonded nonwoven layer, said powder-bonded layer comprising a nonwoven web of fibers, wherein greater than 95 weight percent of the fibers in the nonwoven web are compatible with said polymeric film, said first nonwoven layer being adhered to the first side of the polymeric film by extrusion of said film onto said first nonwoven layer, and

a second moisture vapor permeable nonwoven layer adhered to the second side of the film, wherein said second nonwoven layer is not a powder-bonded layer.

2. (Canceled).

3. (Canceled).

4. (Currently Amended) The moisture vapor permeable, substantially liquid impermeable composite sheet material according to claim 1 ~~claim 2~~, wherein said second nonwoven layer is selected from the group consisting of spunbond, hydroentangled, stitchbonded, and flash spun plexifilamentary nonwoven fabrics.

5. (Canceled).

6. (Canceled).

7. (Original) The moisture vapor permeable, substantially liquid impermeable composite sheet material according to claim 1, wherein said first

Page 3

nonwoven layer is selected from the group consisting of poly(ethylene terephthalate), poly(1,3-propylene terephthalate) and copolymers thereof.

8. (Canceled).

9. (Original) The moisture vapor permeable, substantially liquid impermeable composite sheet material according to claim 1, wherein said composite sheet has a hydrohead of at least 50 cm, and a moisture vapor permeability of at least 600 g/m²/24 hr.

10. (Canceled).

11. (Currently Amended) The moisture vapor permeable, substantially liquid impermeable composite sheet material according to claim 1 ~~claim 2~~, wherein said composite sheet has a bond strength of at least 50 grams/inch between the second nonwoven layer and the film when said composite sheet is either wet or dry.

12. (Original) The moisture vapor permeable, substantially liquid impermeable composite sheet material according to claim 1, which passes the viral barrier test according to ASTM F-1671.

13. (Canceled).

14. (Original) The moisture vapor permeable, substantially liquid impermeable composite sheet material according to claim 1, wherein said polymeric film is no more than 25 micrometers thick.

15. (Canceled).

16. (Original) The moisture vapor permeable, substantially liquid impermeable composite sheet material according to claim 1, wherein said polymeric film is a moisture vapor permeable monolithic block copolyether ester film.

17. (Canceled).

18. (Original) A garment made from the composite sheet material of claim 1, in which the first nonwoven layer forms the outer surface.

Application No.: 09/942405
Docket No.: TK3615USNA

Page 4

19. (Currently Amended) A garment made from the composite sheet material of claim 1 ~~claim 2~~, in which the second nonwoven layer forms the outer surface.

20. (Original) A protective cover for automobiles made from the composite sheet material of claim 1.

21. (Canceled).

22. (Original) A protective cover for crops made from the composite sheet material of claim 1.

23. (Canceled).

24. (Original) Housewrap made from the composite sheet material of claim 1.

25. (Canceled).

26. (Original) A roofliner made from the composite sheet material of claim 1.

27. (Canceled).

28. (Original) A diaper made from the composite sheet material of claim 1.

29. (Canceled).

30. (Original) A sanitary napkin made from the composite sheet material of claim 1.

31. (Canceled).

32. (Original) A cleanroom garment made from the composite sheet material of claim 1.

Application No.: 09/942405
Docket No.: TK3615USNA

Page 5

33. (Canceled).

34. (Original) A steam sterilization wrap made from the composite sheet material of claim 1.

35. (Canceled).
